

Vladut-Andrei Lambru

TECHNICAL GAME DESIGNER / GAMEPLAY PROGRAMMER

v.lambru@st.hanze.nl · vladut-andrei-lambru.github.io/Portfolio · github.com/Vladut-Andrei-Lambru · linkedin.com/in/vladut-andrei-lambru

CMGT student at Hanze University of Applied Sciences, currently completing an exchange at SeoulTech. I work mainly in Unity and C#, building gameplay, VR interaction, movement and feedback systems. Seeking a full-time internship from February 2027 in gameplay programming or technical game design.

SELECTED PROJECTS

Virtual Life Support | Unity · C# · VR · 5-person team

- Built hand-tracked chest compressions, ordered scenario logic, gestures, live rhythm/depth feedback and the results screen for a CPR practice scenario developed with Virtual Life Support.
- Turned interviews and tests with CPR-trained users into interactions; the prototype received 11/12 and was selected as the strongest of five student prototypes.

Tiny Spider Tiny Home | Unity · C# · Gameplay programming · 5-person team

- Implemented movement across floors, walls and ceilings, a level third-person camera, web swinging, appliance interactions and a screen-space outline shader.
- Used surface normals and projected movement so one controller could handle every crawlable surface without separate movement modes.

Maker's Fair | Unity · C# · VR · Lead programmer

- Built the runtime cart-construction mechanics, plank connections, hammer/nail interactions, guidance, UI and bridge-weight challenge.
- Iterated on unstable multi-part physics and added blueprints and placement holograms after playtests showed that the open building system needed clearer feedback.

EDUCATION

Creative Media & Game Technologies, BSc 2024-2028

Hanze University of Applied Sciences · Groningen

Computer Science exchange Aug 2026-Jan 2027

SeoulTech · Seoul

ADDITIONAL EXPERIENCE

Sales employee, Albert Heijn · Groningen · 2024-present

Part-time work alongside university: customer support, restocking and deliveries.

Festival volunteer · Neversea 2023 · Beach, Please! 2024

TECHNICAL SKILLS

Core: Unity, C#, gameplay programming, technical design, Git

Systems: VR/XR interaction, physics, character controllers, cameras, UI/UX

Also used: Unreal Engine, Blueprints, C++, GameMaker

CERTIFICATES

Propedeutic Diploma · Hanze · 2025

Cambridge English · score 173 · 2024

Oracle Academy Database Design · 2023

LANGUAGES

Romanian · Native

English · Professional working proficiency
