

Vladut-Andrei Lambru

Gameplay Programmer | Technical Game Designer

Groningen, Netherlands | Currently in Seoul, South Korea | v.lambru@st.hanze.nl
Portfolio: vladut-andrei-lambru.github.io | GitHub: github.com/Vladut-Andrei-Lambru
LinkedIn: linkedin.com/in/vladut-andrei-lambru

SUMMARY

Third-year Hanze game development student with Unity/C# and Unreal Engine 5/C++ experience. Built movement, physics and VR systems and led programming in five-person teams. Seeking a full-time internship from February 2027.

EDUCATION

- BSc Creative Media and Game Technologies**2024–2028
- Hanze University of Applied Sciences, Groningen, Netherlands | Expected graduation 2028
- Computer Science Exchange Semester**Aug 2026–Jan 2027
- Seoul National University of Science and Technology, Seoul, South Korea | Object-Oriented Programming (Python); Algorithms and Data Structures (C)
- Mathematics and Computer Science**2020–2024
- Colegiul National Grigore Moisil, Urziceni, Romania
- C++ coursework: lists, stacks, queues, sorting algorithms and recursion.

PROJECT

- Time Rewind**2026
- Solo project | Unreal Engine 5, C++, Blueprints
- Created a reusable C++ Actor Component to rewind characters and physics objects, recording transforms, velocities and physics simulation state at fixed intervals.
 - Exposed C++ properties and Blueprint events so the component could be reused across actors.
- Virtual Life Support**2026
- Lead Programmer, Level Design | Five-person team | Unity, C#, Meta Quest 3
- Implemented hand-tracked CPR, chest compressions and scenario progression for a client VR prototype, including live performance feedback and a results screen.
 - Separated scenario state from scoring for depth, rhythm and active CPR time. The project earned 11/12 and ranked first among five student prototypes.
- Tiny Spider Tiny Home**2025
- Lead programmer | Five-person team | Unity, C#
- Built a character controller for continuous floor, wall and ceiling traversal using surface-normal alignment, camera-relative movement and custom adhesion.
 - Added SpringJoint web swinging, camera collision and appliance interactions; contributed to level design, UI/UX and a screen-space outline effect.

SKILLS

Programming: C#, C/C++, Python; object-oriented programming; algorithms and data structures
Tools: Unity, Unreal Engine 5, Blueprints, Git/GitHub, XR Interaction Toolkit, Meta Quest 3
Gameplay: Character controllers, physics, VR/XR, UI/UX, level design, prototyping, playtesting, debugging

WORK

- Albert Heijn | Sales Employee**2024–Present
- Support customers, process deliveries and coordinate daily tasks. Part-time role in Groningen.
- Neversea and Beach, Please! | Festival Volunteer**2023–2024
- Managed artist, VIP and staff access and resolved on-site access issues at festivals in Romania.

CERTIFICATIONS AND LANGUAGES

- Computer Science Competency Certificate**Project grade: 10; Practical exam grade: 9,332024
- Oracle Academy Database Design**2023
- Romanian: Native | English: Advanced — Cambridge English Qualification, score 173 (2024)
