

Vladut-Andrei Lambriu

Gameplay Programmer | Technical Game Designer

Groningen, Netherlands | Currently in Seoul, South Korea | v.lambriu@st.hanze.nl
Portfolio | GitHub | LinkedIn

SUMMARY

Third-year CMGT student at Hanze with Unity/C# and Unreal Engine 5/C++ experience. Led programming in team projects, combining gameplay systems with UI/UX, animation integration and level design. Built movement, VR and rewind mechanics and refined interactions through testing. Seeking a full-time gameplay programming internship starting February 2027.

SELECTED PROJECTS

Tiny Spider Tiny Home

2025

Lead Programmer | Five-person team | Unity, C#

- Built floor, wall and ceiling traversal using surface-normal alignment, camera-relative movement and custom adhesion.
- Implemented SpringJoint web swinging, camera collision and appliance interactions; contributed to level design and UI/UX.

Virtual Life Support

2026

Lead Programmer | Five-person team | Unity, C#, Meta Quest 3

- Led programming for a client VR prototype: hand-tracked CPR, live compression feedback and flag-based scenario progression.
- Implemented UI and animation integration and contributed to level design. The team prototype earned 11/12 and ranked first among five student prototypes.

Time Rewind

2026

Solo project | Unreal Engine 5, C++, Blueprints

- Built a reusable C++ Actor Component recording transforms, velocities and physics state, with Blueprint playback controls and feedback events.
- Designed the puzzle level and implemented cube, platform and laser interactions; documented 25 test cases and iterated with three playtesters.

Combat Progression

2026

Solo project | Unity FPS Microgame, C#

- Extended Unity's FPS template with XP progression and three ranks of movement-versus-weapon upgrade choices.
- Worked on upgrade UI/UX and level design; used ScriptableObjects and events to connect selection with movement abilities, weapon recovery and critical hits.

TECHNICAL SKILLS

Engines and tools: Unity, Unreal Engine 5, Blueprints, Git/GitHub, XR Interaction Toolkit, Meta Quest 3.

Programming: C#, C++; object-oriented programming; Python and C coursework.

Gameplay and design: Character controllers, physics, progression, UI/UX, animation integration, level design, debugging and playtesting.

EDUCATION

BSc Creative Media and Game Technologies

2024-2028

Hanze University of Applied Sciences, Groningen | Expected graduation 2028

Computer Science Exchange Semester

Aug 2026-Jan 2027

SeoulTech, South Korea | Object-Oriented Programming (Python); Algorithms and Data Structures (C)

Mathematics and Computer Science

2020-2024

Colegiul National Grigore Moisil, Urziceni, Romania | C++ coursework

ADDITIONAL EXPERIENCE

Albert Heijn | Sales Employee

2024-Present

Part-time work alongside studies: customer support, deliveries and daily store tasks.

Neversea and Beach, Please! | Festival Volunteer

2023-2024

Managed artist, VIP and staff access and resolved on-site access issues.

LANGUAGES AND CERTIFICATION

Romanian: Native | English: Cambridge English Qualification, score 173 (2024)

Oracle Academy Database Design (2023)
