ABOUT ME

Hi, I'm Vlad — a 19-year-old Game Design student at Hanze University with a passion for building interactive and visually engaging experiences. Before starting my studies, I worked as a freelance graphic designer, which gave me a strong eye for aesthetics and user-focused design.

I'm energetic, curious, and always up for a challenge. Over the years, I've volunteered at festivals and school events, which helped me become confident working in fast-paced, team-driven environments.

As a programmer, I have hands-on experience with both GameMaker Language (GML) and Unity using C#. I've worked on small-scale projects that taught me the foundations of gameplay logic, UI systems, and smooth player interactions.

While I'm still growing as a developer, I'm excited to keep learning and creating games that not only work—but feel great to play.
